

CoreDR Complete DR Planning and Business Continuity

The general benefits of having a disaster recovery plan and infrastructure in place are self-evident. Having a disaster recovery strategy is particularly important in areas such as HR management where there are rigid deadlines and severe consequences for failure. The Core application suite manages some of your businesses most important process. It is critical that organisations using CoreHR plan to ensure that key processes remain fully operational regardless of circumstance.

CoreDR Overview

Core International provide a complete disaster recovery and planning service, which will ensure that even in the event of a complete systems failure, all Core applications remain fully operational and online. CoreDR provides locations from where your payroll can be processed, fully air conditioned hosting, backup and recovery planning and execution, along with expertise to help you during every step of the process.

Our Service

CoreDR is the complete solution because we look after more than just your technology environment. Along with best practice in Oracle database hosting, backup and recovery, we provide multiple locations that you can work from in event of internal systems failure, we provide PC's, printers, advice and stationary. On top of this we work with you to ensure that your plan is realistic and regularly tested.

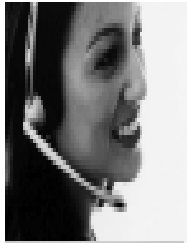

Our Service includes;

- **Multiple DR Locations** – Dublin, Cork, Kilkenny
- **Infrastructure** – Air Conditioned Server Room, Servers, Work Stations, Paypath, Printers, Broadband Connectivity
- **Stationary** – Cheques, Payslips
- **Expertise** – Technical (Oracle), Functional (Payroll, T&A)
- **Planning & Procedures** – DR plans, Roles & Responsibilities, Best Practice, Practical
- **Testing** – Quarterly/ Bi-Annual Testing Plans

What makes CoreDR Different?

Our People

CoreDR is a service that not only ensures that your key systems will remain operational in event of a critical interruption; it also provides the technical and functional expertise to your organisation when you need it most. In the event of an interruption to your payroll process, we will restore your payroll on an alternate server hosted by us and also provide a dedicated payroll resource to work with you to ensure that you get the file to the bank on time.

Our Planning and Support

“Plans are only good intentions unless they immediately degenerate into hard work” – Peter Drucker

CoreDR put the plans and procedures in place to cope with an interruption in service. More importantly, we also work with you to test back up and recovery procedures on a regular basis. This testing plan is written into the Service Level Agreement (SLA), and we work hard to make sure that the plans are effective, realistic and efficient.

Roles & Responsibilities

We ensure that in the event of a disaster happening everybody from your organisation to ours understands their roles and responsibilities, and the procedures that are in place. Comprehensive planning means the amount of down time that your organisation experiences is minimised.

Benefits of CoreDR

- **Core International** are the **most suitable people** to be involved in payroll recovery in event disaster
- **CoreDR** is the complete solution to **CoreHR** DR support not just a technical one
